## Sensory Room

## Information Guide

## What is a Sensory Room

---

The sensory room fosters an atmosphere of relaxation and offers people with cognitive impairments and other challenging conditions the opportunity to enjoy and control a variety of sensory experiences.

## Benefits of use

---

Providing a stimulating environment can:

- Increase concentration and focus attention
- Develop or reactivate senses of hearing, sight, smell, touch, and taste
- Heighten awareness and improve alertness
- Improve coordination and motor development
- Promote cognitive development by increased brain function

## Induction Procedure

---

Every customer must have an induction before booking a slot in sensory room. This is to gain some background information on the client.: their likes, dislikes, health condition and disability. Staff will then be aware of what is suitable for the client during their session.

As part of the induction the support worker will be shown

How to use equipment correctly to benefit their client.

How to clean the equipment, suitable for next customer.
